

# ADAMELLO STEEL S.p.A.

Capitale Sociale € 517.000.= i.v.

Founded in 2000 with the aim of expanding the range of Metalcam Group products, **Adamello Steel** has achieved a prominent position - especially in Italy – among the producers of hot-rolled plates in tool steel.

Using the steel produced by Metalcam, **Adamello Steel** has over the years increased fivefold its production meeting all customer requests both in terms of quality and service provided, ensuring a good sector flexibility either with supplies and product range.

## Production Sectors

Meeting the market demands our production has been focused in the following sectors:

- Heat Treatable Tool Steel (18NiCrMo5 - 39NiCrMo - 32CrMo4 etc.)
- Hot Work Tool Steel for plastic molding (W 1.2311 - 1.2312 - 1.2738 etc.)
- Cold Work Tool Steel (W 1.2842 - 1.2510 etc.)
- Case-hardening steel
- Nitrating steel

Using the melting shop owned by the Metalcam Group means being able to meet customer expectations, even not standardized, customizing the production on the basis of technical / qualitative requirements of all customers.

## Dimensions of production

- Thickness: from 10 mm up to 160 mm according to customer requirements
- Width: from 200 mm up to 2500 mm
- Length: from 3 to 7 meters and / or according to customer requirements

## Heat treatments

All plates manufactured by us are heat treated and can be provided:

- Quenched and tempered
- Annealed
- Normalized

with values and characteristics that can satisfy the special requests of the customers.

## Material Testing

Before shipment on all plates manufactured by us we carry out the following inspections :

- Chemical Analysis
- Ultrasonic Examination
- Hardness Test
- Visual and dimensional test

By means of Metalcam Group laboratories we have the possibility to carry out in our plant all necessary tests and metallographic analysis.
